

**Letter of Recommendation
For
Carolina Fire Control, Inc.**

To Whom It May Concern:

In late January of 2005, Carolina Fire was retained by Batson-Cook Company to furnish and install the Fire Sprinkler System within a 14 story office building in downtown Charlotte, NC. It was vital for them to complete their work within the critical path time line in order for us to finish the project on time. Their work included a new fire pump, stand pipes, FM-200 system, both wet and pre-action systems with tenant work on 12 floors.

I can say with confidence that Carolina Fire met or exceeded all portions of their scope of work. Due to the nature of this project, there were many pricing exercises that were required and Carolina Fire provided accurate and timely information each instance, which aided us in successfully completing this project. All base contract and extra work was completed in May of 2006 with some added change order work performed in September of 2006.

Judging from their performance on this project, with a final contract value of \$699,870.00 (Six Hundred Ninety Nine Thousand Eight Hundred Seventy Dollars), I would recommend them for any project with similar complexities and personally look forward to partnering with them on another venture.

Sincerely,
Batson-Cook Company

Tim Grimes
Project Manager
