RE: Andale Facebook FRC1 Project

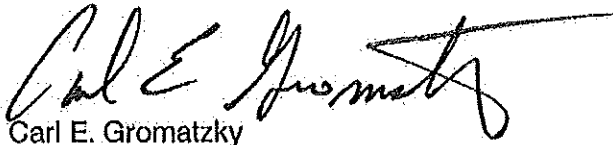

Dear Jeff,

The Andale Facebook project in Forest City North Carolina has been an incredible challenge. With over 370,000 sq ft of space and a very fast track schedule, Carolina Fire has certainly helped make this project a huge success.

Carolina Fire has been an exemplary team member going above and beyond to help the entire process from coordination and planning, working with the local inspectors, FM global and Facebook to solve issues and insure we receive our Certificate of Occupancy on time.

I would recommend your company to any company requiring a first rate Fire Protection contractor for a very complicated fast track project.

Best regards,

Carl E. Gromatzky
